

Leading the way in sushi innovation.

Ricewrap Foods' sushi solution is a complete program for an easy, student-run "In-House Sushi Station." Ricewrap Foods offers a variety of frozen, pre-formed rice and pre-portioned protein products that return to their original texture and taste once thawed.

The University of New Orleans, a Chartwells-managed institution, prides itself in *taking the lead from their guests*. Throughout the pandemic, as well as post-Covid, UNO's Executive Chef, Scott Goodstal, says his most profitable item was Ricewrap sushi.

"I have been using Ricewrap products for over 4 years. Ricewrap allows me to realize exceptional margins, as this station outperforms all others. But even more importantly, I can offer my students their favorite food – sushi!"

Training

"Finding qualified workers was extremely hard during Covid, so using high-quality, low-skilled labor items was key. Ricewrap fits that bill by being extremely profitable and so easy to use. I had student workers making our wildly popular sushi."

Scott Goodstal, Executive Chef at University of New Orleans
